ALWAYS BE READY

A MESSAGE FROM OUR CEO

Welcome to our 2022 Catalog. We are honored to serve those who serve and to support our dealers who do the same. I thank our public servants and military personnel for their service and commitment to the greater good.

Since we were founded, 5.11 has focused on innovation for our customers whether that is on a call, training, deployed or enjoying their favorite activities. As always, we do so with the direct input of our customers. Engineering purpose-built products that offer comfort, durability, and utility – all while looking sharp.

This season, we are excited to introduce expanded 5.11 Stryke® Patrol Duty Uniforms, new women's apparel, new range bags and an assortment of Everyday Carry essentials. If you're a podcast listener, I invite you to give an ear to "Call To Service", our podcast where we visit with individuals who are called to serve and are always ready.

Thank you,

Francisco J. Morales
CEO, 5.11 Inc.

WATERPROOF BREATHABLE RATINGS

When you see features like 10K/10K noted on a piece of outerwear, we're not talking about social media followers but instead the waterproof breathable performance of the garment. The first number represents how much pressure is required to force water through the membrane, the higher the better. The second number represents how much moisture the membrane can transport away from your skin to be evaporated, the higher the better.

WATERPROOF RATINGS

1K: Rain resistant - however briefly. Common rating for a garment with only a DWR coating.

5K: Can be called rainproof, but will not perform in extended periods of time or heavy downpours

10-15K: Will stand up to serious extended rain and heavy sleet/snow

20K+: Monsoon-ready

BREATHABLE RATINGS

5-10K: Comfortable for mild activity

10-15K: Comfortable for most activity

15-20K: Extended physical activity

BLOOD BORNE PATHOGEN RESISTANCE

An independent laboratory has tested this product and has found that the materials provide passing results when tested in accordance with ASTM F 1671, Standard Test Method for Resistance of Materials Used in Protective Clothing to Penetration by Blood-Borne Pathogens.

It is important to note, however, that, even though garment materials may satisfy the standards of ASTM F 1671, it might not provide an adequate barrier to viruses in all conditions and our products will not protect the wearer from all blood-borne pathogens and viruses under all conditions.
